## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. **Claims 1-24 and 41-64**, drawn to an apparatus and method of using an elongated tubular member having a first deployable structure and a second deployable structure, classified in class 604, subclass 264.
- II. **Claims 25-40 and 65-80**, drawn to an apparatus and method of using a catheter and an elongated core member, classified in class 604, subclass 523.
- III. **Claim 81**, drawn to a method for treating a blood clot in a cranial blood vessel, classified in class 604, subclass 508.

The inventions are distinct, each from the other because of the following reasons:

**Inventions I and II** are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I and II have separate utility in view of the structural differences presented above. See MPEP § 806.05(d).

**Inventions (I and II) and III** are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the method disclosed in claim 81 is a method of treating a blood clot in a cranial blood vessel, which has a different mode of operation, a different

function, and consequentially, a different effect when compared to the methods of groups I and II above.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Manuel Mendez whose telephone number is 703-308-2221. The examiner can normally be reached on 0730-1800 hrs.
